Call for Abstracts: Late Breakers, Evidence-Based Research, and Student Abstracts opens October 1st

The 2010 SNRS Annual conference in Austin, Texas will incorporate new venues for disseminating emerging research findings to the community of nursing scholars. We are launching an inaugural poster discussion format for presenting research. This format combines the classic poster session (author present to answer questions about the study) followed by group discussions by poster authors and other attendees. The podium discussions in these sessions are not presentations of the study, but rather discussions of issues that cut across the group of posters. *Poster discussion formats will be used for Late Breakers and Evidence-Based Research.*

The abstract system will open on October 1st, 2009 for the Late Breakers, Evidence-Based Research, and Student abstract submissions.

- **Late breaker** abstracts allow presentations of cutting-edge research which was not available at the time of the regular abstract deadline.
- In addition we are inviting our nurse scientists in practice (Magnet hospitals, VA nurse scientist training programs, etc.) to submit abstracts of *research and evidence based practice.*
- **Student abstracts** may be submitted by students currently enrolled in programs, as well as members who completed the work while a student (previous year). These abstracts must describe completed research (may be preliminary findings) or methodology abstracts (innovative methodologies).
- Late breaker, evidence based practice and student abstract submission call closes on Thursday, October 15, 2009, 5 PM central time zone.

- Guidelines for the late breaker, evidence based practice, and student abstracts submissions will be sent via e-blast by September 1, 2009.
